[About us](#)

A blue rectangular graphic with a network diagram pattern of white dots and lines. The text "Into the EVERSE" is centered in white, bold, italicized font.

Into the EVERSE

Welcome to the latest edition of the EVERSE newsletter, designed for you, our community, to keep you up to date with the latest news, events and updates from across our growing network!

Summer is almost in full swing, and with the warmer (or frankly, too hot) weather comes the next edition of the EVERSE newsletter, where you can find out all about what we've been up to in the past few months. Pre-holiday reading, if you will.

In this issue, find out about our recent webinars on the Credit and Recognition Framework and EVERSE Training, get the scoop on our Research Software Quality Across Continents event, our collaboration with LUMEN – and more!

Happy reading!

Exploring Research Software Quality Across Continents

Research Software Quality Across Continents

Do you write code in research?

Boost your research software quality

Open Source and best practices

Tools and metrics for RSEs

Tuesday 14th April 2026

10:00 - 14:30 CET

Online

An EVERSE-Africa Engagement Event

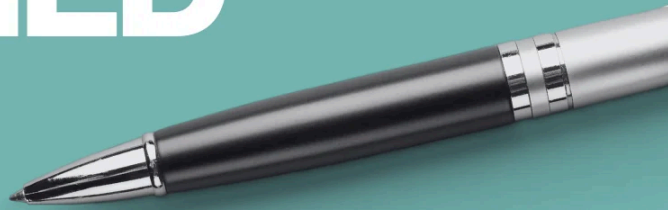

eosc | EVERSE | UCT eResearch | SCIENCE FOR AFRICA

On 14th April, along with [UCT eResearch](#) and the [Science for Africa Foundation](#), we organised *Research Software Quality Across Continents* – where over 40 research software engineers representing 18 countries across Europe and Africa came together online to explore the challenges, best practices and opportunities in improving research code.

EVERSE and LUMEN join forces to strengthen research software quality

MoU SIGNED

LUMEN & EVERSE entered into a Memorandum of Understanding.

Big news! Back in April, we signed a memorandum of understanding with LUMEN, with the goal of strengthening research software quality across EOSC.

Want to find out more about our collaboration?

Important update about the EVERSE Network Mattermost

Many of you will already be familiar with Mattermost, where we share updates and information and communicate with our community. This Mattermost account was hosted by Helmholtz, however **from 15th July this will no longer work**. To make the transition to a different communication platform as seamless as possible, we will be moving to the CERN version of Mattermost.

Please create your account on the new CERN-hosted instance as soon as possible, and **no later than Friday 3rd July**, to ensure continuity.

Join the new channel using [this invitation link](#).

All the information you will need to create your account can be found in [this article](#).

If you encounter any problems, please reach out, either on Mattermost (up until 15th July!) or [send us an email](#).

Enhancing the user experience of EVERSE Training

EVERSE
TRAINING

EVERSE members [Kenneth Rioja](#), [Hugo Bacard](#) and [David Chamont](#) recently came together to discuss potential ways of enhancing the user experience of [EVERSE Training](#) and improve access to higher quality training materials.

Catch up on our latest EVERSE Network webinars!

A Credit and Recognition Framework for RSEs and Trainers

In this webinar, we introduced the Credit and Recognition Framework, aiming to make all types of research contributions visible and valued, taking into account the needs of the research community.

A Training Catalogue for Research Software Quality

In our latest webinar, we focused on EVERSE Training – a training catalogue designed as a one-stop shop for trainees to discover content and trainers to showcase their work. If you want to find out more about how EVERSE Training came to be, as well as the open-

source infrastructure behind it, metadata and recognition for contributors, watch the webinar and explore [EVERSE Training](#) to learn more.

EVERSE out and about

Over the past few months, we've been out representing EVERSE at a smattering of events around the world. Here's a little taste of what we've been up to!

EVERSE at CHEP 2026

At this year's Conference on Computing and High Energy Physics (CHEP), several project members represented EVERSE through a series of talks.

[Read more about EVERSE at CHEP](#)

Crafting research software stories at the STEERS-EVERSE hackathons

ELIXIR STEERS and EVERSE recently came together for a hackathon focused on drafting research software stories. Participants worked on finding out what exactly a research software story is, why they are important, and how to craft their own. Following the success of the first hackathon in April, a second took place on 11th June.

Holiday reading

If you're clutching at straws over what to read this summer, here are a few papers and articles that might pique your interest...

[BSSw blog post about EVERSE](#)

[EOSC Steering Board opinion paper: EOSC as an indispensable component of FP10 European Partnership portfolio](#)

[Research Software Engineers in the Age of GenAI: Same Value, Changing Practice](#)

[EOSC-A calls for a distinct Work Programme-based Partnership for EOSC in FP10](#)

Upcoming events

RSQKit Contentathon

 30 June 2026

 Online

This event will focus on contributing new and improved content to the [Research Software Quality Toolkit \(RSQKit\)](#)

[Find out more](#)

LifeWatch ERIC Biodiversity and Ecosystem e-Science Conference

 7-10 July 2026

 Plovdiv, Bulgaria

EVERSE members Eleonora Parisi and Zhiming Zhao will deliver an in-person training session about EVERSE quality indicators and tools.

[Find out more](#)

International Research Software Conference (IRSC)

 7-8 September

 Sheffield, UK

EVERSE will be represented by several project members across multiple sessions, including talks, posters and a Birds of a Feather session. We'll be sharing more information about our participation at IRSC soon!

[Find out more](#)

RSECon26

 9-11 September 2026

 Sheffield, UK

Similar to the IRSC, EVERSE will also be represented through a series of talks and posters.

[Find out more](#)

Improving Research Software Quality in Europe

 24 November 2026

 Brussels, Belgium (invite only)

This invitation-only EVERSE stakeholder engagement event will bring together key stakeholders, such as policymakers and research software engineers, to communicate EVERSE's unique experiences across a range of research software concerns and explore pathways for collaboration. Key insights and outcomes will be shared with the wider EVERSE community following the event.
